

Hydrotherapy

Adaptable safety bars

REF. 6002.00

DESCRIPTION :

These bars are intended to allow the multiplication of the working stations in a swimming pool of rehabilitation, by multiplying the «Angles» in which can lean patients.

FEATURES :

- Ø33.7mm stainless steel tube (AINSI 316L).
- System of fixing on the handrail, accessible since the edge from the pool.
- Adjustable strut, with plastic end : do not require any transformation of the pool.

It is advisable however to check if fixings of the handrail are ready to support the weight of the apparatus and the patient at the time of the exercises.

This equipment cannot be used if the basin is empty.
