SUSTAINABLE WELL-BEING

Shower & Bath

Rubis

Step 1

Firstly, fill **Rubis's** water container.

Step 2

Position **Rubis** at the end of the bed and select temperature. Press the heater button and wait for **Rubis** to reach desired temperature (this takes approximately ten minutes from cold)

Step 3

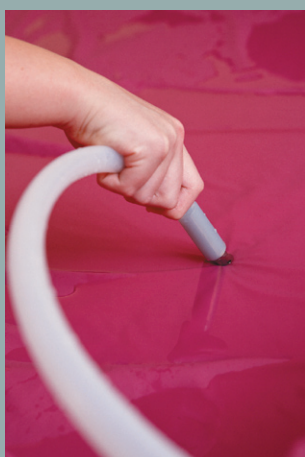

Lay one half of the purpose designed, double-width towel over the mattress, and allow the other half to rest over the side rails.

Step 4

Next, fit the waterproof sheet under the patient. Position the sheet as evenly as possible using the fasteners provided, and fix to side rails and bed ends to ensure water containment.

Step 5

Unclip the shower hose in readiness to use. Then unclip the water vacuum hose and position it at the lowest point of the mattress where water pools fastest. Remove the patient's clothing and check the water output temperature prior to application.

Step 6

When the water temperature has reached the desired pre-set temperature it can then be applied to the patient.

Step 7

With the shower procedure complete the patient can be dried and the sheet removed and stored. The patient can then be dressed.

Step 8

With the hygiene procedure complete **Rubis** can then be emptied of waste water, and cleaned in readiness for the next use.
