Mobility - An essential to staying healthy.

8pts Stretcher with Mechanical Leveller

REF. 5497.00

The 8pts Stretcher is intended to lift and transfer the patients in a horizontal position thanks to a sling. Common areas of use are in surgical wards, but even in intensive care wards and X-ray departments. A mechanical Leveller makes easier the regulation of the centre of gravity during lifting.

REVAL
SUSTAINABLE WELL-BEING

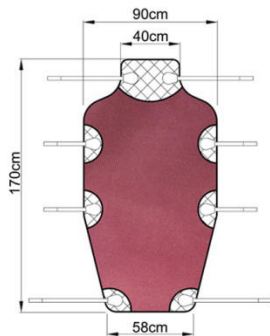

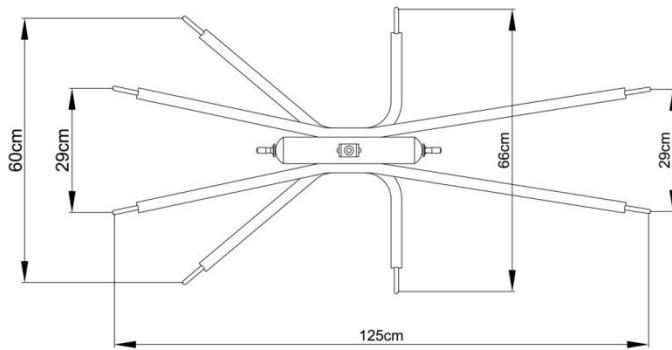

UNIQUE FAITURES

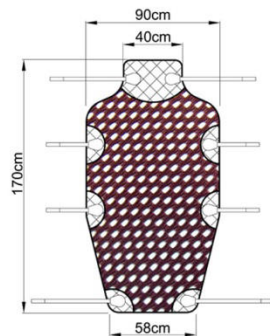

- Solid Stretcher Sling with “Easygliss” coating for easy application or Mesh Stretcher Sling.
- 2 positions available for the slope of the head of the patient.
- Mechanical Leveller for a perfect horizontal lifting of the patient.
- Compatible with “Reval Scale III” Scale System.
