

Hygiene

Quattro Vanguard Macerator

The natural, economic and ecological destruction of waste.

Macerator to collect disposable items

REF. 2103.00

Reduce the sources of infection, put the caregiver back at the heart of his profession, offer a comfortable and hygienic solution for the patient : the macerator is the answer to disposal of human waste and single use medical pulp containers.

REVAL
SUSTAINABLE WELL-BEING

UNIQUE FEATURES

- Undeniable benefit in terms of hygiene.
- Limit the risk of cross-contamination.
- Simplification of basin rotation protocols with easy management of clean and dirt.
- Optimises the working time of nursing staff.
- Very quiet.
- Environmentally friendly products (HQE standards).
- Economic use: 15 to 22 litres of water per cycle depending on model and without chemicals.
- Wide variety of single use items and accessories.

The macerator consists of pulverisation and disposal unit and a range of single-use items made from natural cellulose. The system, based on a short cycle, optimizes operating costs while fully respecting the environment.

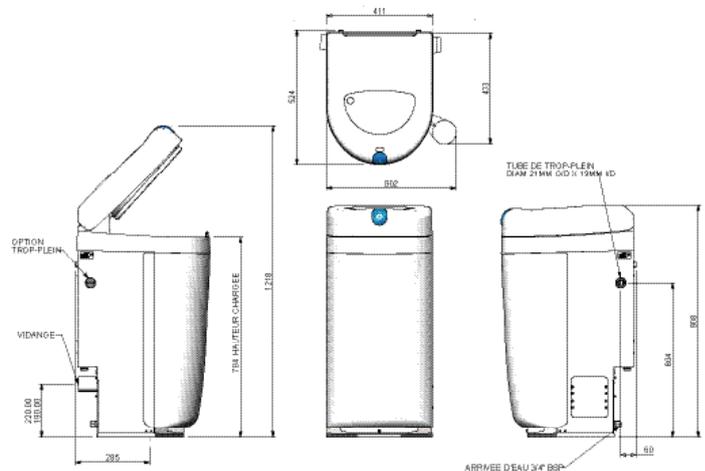

Macerator to collect disposable items

REF. 2103.00
